BOUQUETS

SEASON AFTER SEASON, GARDEN ROSES, calla lilies and orchids remain the flowers bouquet dreams are made of. For the more adventurous, hard berries, vegetables, succulents, herbs, grasses, foliage, vines, crystals, pearls and ribbon offer new textures, colors, contrast and a touch of glitter. Choose a bouquet that complements the style of your dress, while remembering to keep size proportional.

Monochromatic arrangements vary from pure white

to dark red to innovative green and brown tones. Tightly-controlled arrangements with flowers in the same hues, form dramatic geometric designs. Monochromatic or in sharply contrasting colors, they add sophistication and drama to an understated dress.

Overflowing bouquets in amorphous shapes with softly fading tones complement the romance of a flowing gown. Whatever your choice, make it reflect your own unique personal style. 🍀
